Position : Prestressed Precast Hollow Slab Manufacturing Plant Manager
Location : Web Housing, Kilifi Site
Employer : Web Housing Co. Ltd
Job Type : Contract
Reports To : Project Manager / Web Housing Manufacturing Manager

1) Company Overview

Web Housing Co. Ltd, part of Web Housing Group, delivers modern, durable, and cost-effective real estate solutions across Africa. Using prefabricated components manufactured at our Kilifi facility, we ensure efficient construction. We are currently expanding operations and seeking a qualified Plant Manager to lead the setup, commissioning, and full operation of our prestressed precast hollow slab manufacturing plant.

2) Role Overview

The Plant Manager will oversee end-to-end operations from infrastructure setup and commissioning to daily production management. Key focus areas include quality control, safety compliance, team supervision, and process optimization.

3) Key Responsibilities

- **Plant Setup & Commissioning:** Oversee construction and installation of production systems; lead testing and commissioning in line with design and safety specs.
- **Production & Process Management:** Manage daily slab production; ensure correct prestressing, batching, and curing; drive lean practices.
- **Quality, Safety & Compliance:** Enforce HSE policies; collaborate with QA/QC teams; ensure compliance with national and international precast standards.
- **Team & Resource Management:** Supervise production staff; plan manpower and training; foster accountability and continuous improvement.
- **Coordination & Cost Control:** Align production with project timelines; manage materials; track performance and budget; recommend efficiency improvements.

4) Qualifications & Experience

- Bachelor's degree in Civil, Structural, Mechanical, or Industrial Engineering (Master's is a plus).
- 3-5 years in precast concrete manufacturing, with at least 3 years in a supervisory or managerial role.
- Strong knowledge of prestressing systems, concrete technology, and ERP/production planning tools.

5) Skills & Competencies

- Proven leadership and team management with strong cross-functional coordination skills
- Technical problem-solving and decision-making rooted in engineering principles
- Proficient in interpreting engineering and production drawings
- Strong commitment to safety, quality, and operational efficiency

How to Apply: Please send your CV, cover letter, academic certificates, and portfolio (if available) to Veronica.s@shemugroup.net with the subject line "Application - Prestressed Precast Hollow Slab Manufacturing Plant Manager" by 05th September 2025.
